Azimuth, degrees

Data starts 2022 11 09 00:00:00

Two side-by-side skyplots for station HUEL. The left plot is for parameter M1X and the right plot is for parameter M5X. Both plots show a circular sky map with concentric circles representing magnitude (10 to 90) and radial lines representing azimuth (0° to 315°). The data points are represented by small circles of varying sizes, indicating the magnitude of the objects. The left plot (M1X) shows a higher density of objects compared to the right plot (M5X).
