Two side-by-side skyplots for station RODI. The left plot is for parameter M11 and the right plot is for parameter M5X. Both plots show data from the Data file RODI00ESP_R_2025356.xtr. Each plot is a circular rose diagram with concentric circles representing values from 10 to 90 and radial lines representing directions from 0° to 315° in 45° increments. The data points are represented by small black dots forming a circular pattern.
