Skyplot for station SONS. Signal to Noise S1C Data file SONS00ESP_R_2025356.xtr

Skyplot for station SONS. Signal to Noise S2S Data file SONS00ESP_R_2025356.xtr

The figure displays two side-by-side skyplots for station SONS. Both plots use a circular coordinate system where the radial distance from the center represents the signal-to-noise ratio (S/N) and the angular position represents the azimuth. The radial lines are labeled with S/N values: 10, 20, 30, 40, 50, 60, 70, 80, and 90. The azimuthal lines are labeled with angles: 0°, 45°, 90°, 135°, 180°, 225°, 270°, and 315°. The left plot, titled 'Skyplot for station SONS. Signal to Noise S1C Data file SONS00ESP_R_2025356.xtr', shows a prominent signal at the 0° azimuth, reaching an S/N of approximately 80. The right plot, titled 'Skyplot for station SONS. Signal to Noise S2S Data file SONS00ESP_R_2025356.xtr', shows a prominent signal at the 180° azimuth, reaching an S/N of approximately 80. Both plots show a clear signal at the 0° and 180° azimuths, with the signal strength decreasing as the azimuth moves away from these directions.
