Two side-by-side skyplots for station SPAB. The left plot is for parameter M1X and the right plot is for parameter M5X. Both plots show data from Data file SPAB00ESP_R_2025071.xtr. The skyplots are circular with concentric circles representing magnitude (10 to 90) and radial lines representing azimuth (0° to 315°). The plots show a distribution of data points across the sky, with a higher density of points at lower magnitudes (brighter objects) and in the central region (around 0° azimuth).
