Azimuth-elevation plot for station VBLO. Signal to Noise S1C. Data file VBLO00ESP_R_2025061.xtr

Elevation, degrees

Azimuth, degrees

Data starts 2025 03 02 00:00:00

The figure displays two side-by-side skyplots for station VBLO. Both plots are circular and use a polar coordinate system where the radial distance from the center represents magnitude (ranging from 10 to 90) and the angular position represents azimuth (ranging from 0° to 315°). The left plot is for parameter M1C, and the right plot is for parameter M2C. Both plots show data from the file VBL000ESP_R_2025061.xtr. The skyplots are empty, showing only the grid lines and no data points.
