Two side-by-side skyplots for station BLGU. The left plot is for parameter M1X and the right plot is for parameter M5X. Both plots show data from file BLGU00ESP_R_2026184.xtr. The skyplots are circular with concentric circles representing magnitude (10 to 90) and radial lines representing azimuth (0° to 315°). The left plot (M1X) shows a dense distribution of points, particularly in the 0° to 45° range. The right plot (M5X) shows a similar distribution but with fewer points, indicating a different filter or selection criteria.
