Figure 1 displays two skyplots for station BUIT. The left plot shows the M1c parameter, and the right plot shows the M2X parameter. Both plots are circular with concentric circles representing values from 10 to 90 and radial lines representing angles from 0° to 315° in 45° increments. The left plot shows a dense distribution of data points, while the right plot shows a sparse distribution. A color bar on the left indicates values from 0.0 to 80.0.
