Skyplot for station BUIT. Signal to Noise S1C Data file BUIT00ESP_R_2026240.xtr

Skyplot for station BUIT. Signal to Noise S2C Data file BUIT00ESP_R_2026240.xtr

Both skyplots display concentric circles representing signal-to-noise ratio (SNR) levels, ranging from 10 to 90. The radial lines indicate azimuth angles in degrees, marked at 0°, 45°, 90°, 135°, 180°, 225°, 270°, and 315°. The data points are represented by small black dots scattered across the plots, showing a higher concentration of points in the lower right quadrant (around 135° to 225° azimuth).

Azimuth, degrees

Data starts 2026 08 28 00:00:00

Two side-by-side skyplots for station BUIT. The left plot is for parameter M1C and the right plot is for parameter M2C. Both plots show data from the BUIT00ESP_R_2026240.xtr data file. Each plot is a circular sky map with a color scale from 0.0 to 80.0. The plots show a complex pattern of data points and lines, with a color bar on the right of each plot indicating the intensity of the data. The data starts on 2026-08-28 at 00:00:00.
